

Nuclear Nonproliferation International Safeguards Graduate Fellowship Program

The Nuclear Nonproliferation International Safeguards Graduate Fellowship program (NNIS) provides support to graduate students pursuing doctoral degrees in nuclear science and engineering disciplines directly relevant to international safeguards and nuclear nonproliferation. This program aims to cultivate the next generation of highly qualified scientists to meet the National Nuclear Security Administration's need for expertise in both the technical and policy aspects of nonproliferation and international safeguards.

- Monthly stipends and tuition assistance
- Conference travel assistance
- Gain theoretical and applied work experience during practicums at DOE laboratories
- Closely interact with nuclear nonproliferation technical and policy experts and DOE laboratories at U.S. Government agencies
- Yearly appointments with the option to renew

ELIGIBILITY: This fellowship is open to all individuals who will be starting graduate studies or graduate students who are currently enrolled in a qualified course of study (see www.scuref.org for qualified areas of study) and have at least one full year of graduate work remaining at the beginning of September 2014. Applicants must be U.S. citizens.
